Dear Judge Schreier,

You sentenced me to 360 months on Nov 14 2017. You said there were many things that warranted me a sentence reduction but you chose not to. Besides my diminished capacity at the time of my crime, I was also suffering from glaucoma, COPD and lymphoma.

On June 12 2020 I was told that I'm now legally blind. It came from the care I'm not getting in the federal prison system and the South Dakota State Penitentiary giving me the wrong eye drops for 3 months. Even when I told them they were the wrong drop they insisted I was wrong and threatened to displease me when I complained. Even when they found out they were the wrong drops they just took my vitals but never had me see an eye doctor.

I got here to Leavenworth 12-16-17 my eye site was so bad and painful so in 2 hrs I had to get a tube installed in the one good eye I could see out of. My vision has never been the same and my doctor is surprised I can see at all. From the two eye drops I took two times a day, I'm now at seven. Two I take four times a day. Oh I'm supposed to. You see I was prescribed them on June 12 2020 today is the 23rd and for some reason I still don't have them. I e-mailed the doctor here I've talked to the med staff tell I'm blind in the face and yet no drops. The back of my eye is filling up

Open

with fluid making me loose the left leg site I have left. My right eye now is like driving in a deep fog with your high beams on. I can't make people out unless they were feet away. I just got new pictures of my kids but I can't make them out. I'm lucky from the paper writing you but my friends need me my mail.

Under 3842 (C)(1)(A) you can give me a sentence reduction. You can put me under house arrest. I have a place to stay with my good friend Dave Sweeney of Sweeney Tile and his family. I'm a veteran so I can get better medical care at the VA hospital there than here. They want to do laser surgery. The thing is if I start seeing spots or go completely blind I'm suppose to seek medical attention right away. That's not going to happen here. I saw two people have heart attacks right in front of me while complaining to the guards something was wrong with them.

I'm at your mercy and I pray you get me out of here so I can get good medical care. The prison system is shut down and I can't be transferred to one of those hospitals or a better prison. I've ask for compassionate release here for the last 3 months and get ping-ponged back and forth from the warden to counselor to warden. No one does nothing and knows I'm totally blind. I stay in my cell in the dark all day every day. Please help me.

The compassionate  
may be 3582 (C)(1)(A)

Sincerely,  
Jon H Bryant SR
